Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith & Nephew.
3. The reference discloses adhesives usable as medical dressings that are capable of being switched from a tacky to non-tacky state (abstract). A preferred adhesive comprises the reaction product of an isocyanate-terminated polyurethane and a hydroxy-functional acrylate monomer (p. 7 lines 1-32). These monomers have a hydroxyl reactive group to form the resulting polymer and a C-C double bond capable of curing by radiation. Adhesive bandages and dressings are formed by applying the hardenable adhesive to a backing layer (figures). Example 5 teaches a polymer containing hydroxyethyl methacrylate monomer residues, where the adhesive hardens and shrinks upon irradiation.
